VeEX® Launches Test with Flow™ SaaS Solution for Telecommunications Workflow Management

Fremont, Calif., February 29, 2024 - VeEX Inc., a global leader of innovative test and measurement solutions for next-generation networks, today introduced Test with Flow™, a dynamic Software-as-a-Service (SaaS) solution designed to modernize results collection and process enforcement for businesses in the telecommunications sector.

In an industry where speed and efficiency are paramount, businesses often face unique hurdles in managing and submitting field test records. VeEX's Test with Flow SaaS solution fills this gap by offering a lightweight, yet powerful test result repository tailored to their needs. With intuitive user interfaces and comprehensive workflow guidance, the platform simplifies the collection, management, and submission of field test records, empowering small service providers and contractors to enhance operational efficiency and compete effectively in the market, without having to invest in, or manage, complex infrastructure.

Key features of VeEX's Test with Flow SaaS solution include:
- Mobile-friendly user interface designed for ease-of-use by small business teams
- Seamless integration with existing workflows for minimal disruption
- Cloud-based storage ensuring accessibility, availability and security
- Customizable workflow guidance to support standardized practices and compliance requirements
- Location intelligence

"Test with Flow is perfect for businesses and individuals who want an easy way to manage their testing and reporting," said Tri Nguyen, Product Manager at VeEX. "Being a cloud-based SaaS, Test with Flow is easy to sign up and cancel whenever you need. Plus, there is no hardware to purchase, host, secure, maintain or manage."
